Problem – Solution Fit for ShopEZ:

Problem-Solution fit canvas 2.0

Purpose / Vision

Define CS, fit into CC 1. CUSTOMER SEGMENT(S) Who is your customer? I.e. working parents of 0-5 y.o. kids CS Customers looking to purchase products online. Sellers managing product listings and orders. Administrators monitoring users, products, and transactions.	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices. CC Difficulty finding trusted products. Lack of price comparison options. Limited order tracking visibility. Concerns about payment security.	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking AS Amazon Flipkart Myntra
Focus on J&P, tap into BE, understand RC 2. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides. J&P Find products quickly and easily. Compare products before purchasing. Place orders securely online. Track order status in real time. Manage inventory and product listings efficiently.	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations. RC Traditional shopping requires physical visits. Product comparison across stores is difficult. Lack of centralized product management. Customers need a faster and more convenient shopping process.	7. BEHAVIOUR What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer; calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace) BE DIRECTLY: Searches products online. Compares prices and reviews. Adds items to cart. INDIRECTLY: Reads reviews. Takes recommendations from friends and social media.
Identify strong TR & EM 3. TRIGGERS What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news. TR Need to buy a product online. Need doorstep delivery.	10. YOUR SOLUTION If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour. SL ShopEZ is a MERN-stack e-commerce platform that allows users to browse products, manage carts, place orders, and track deliveries. It also enables sellers and administrators to manage products, inventory, and customer orders efficiently.	8. CHANNELS of BEHAVIOUR 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 CH E-commerce websites Mobile applications.
Extract online & offline CH of BE 4. EMOTIONS: BEFORE / AFTER How do customers feel when they face a problem or a job and afterwards? I.e. lost, insecure > confident, in control - use it in your communication strategy & design. EM After using ShopEZ they feel satisfied with a smooth shopping experience.	8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. Recommendations from family and friends Retail stores for product comparison

1. Customer Segments (CS)

ShopEZ targets customers who prefer online shopping for convenience and time savings. It also supports sellers who need a platform to showcase products and manage orders. Administrators use the system to monitor products, users, and transactions. These user groups collectively form the core audience of the platform.

2. Jobs-To-Be-Done / Problems (J&P)

Customers need an easy way to search for products, compare prices, and make purchases securely. They also expect real-time order tracking and reliable delivery information. Sellers need efficient inventory and order management tools. ShopEZ addresses these requirements through a centralized online platform.

3. Triggers (TR)

The increasing demand for online shopping encourages users to choose digital platforms over traditional stores. Customers are often motivated by convenience, doorstep delivery, and access to a wide variety of products. Seasonal sales, discounts, and promotional offers also act as major triggers for purchases.

4. Emotions: Before / After (EM)

Before using ShopEZ, customers may feel uncertain about product quality, pricing, or availability. The process of visiting multiple stores can also be frustrating and time-consuming. After using the platform, users experience convenience, confidence, and satisfaction due to easy product access and smooth order processing.

5. Available Solutions (AS)

Several popular e-commerce platforms such as Amazon, Flipkart, and Myntra already provide online shopping services. These platforms offer extensive product catalogs and delivery networks. However, they are often complex for educational projects and small-scale businesses. ShopEZ provides a simplified alternative while demonstrating real-world e-commerce functionality.

6. Customer Constraints (CC)

Customers may face challenges in identifying genuine products and comparing prices effectively. Concerns regarding payment security and transaction safety can also influence purchasing decisions. Some users may experience difficulties tracking orders or understanding delivery timelines. These constraints affect overall customer confidence.

7. Behaviour (BE)

Customers usually begin by searching for products and comparing alternatives based on price, reviews, and ratings. They often add items to their cart before making a final purchase decision. Recommendations from friends, social media, and online reviews significantly influence buying behavior. Users prefer platforms that provide convenience and transparency.

8. Channels of Behaviour (CH)

Customers primarily interact with ShopEZ through websites and mobile devices. Online channels allow them to browse products, place orders, and track deliveries. Offline influences such as family recommendations, advertisements, and product experiences also contribute to purchase decisions. Both channels play an important role in customer engagement.

9. Problem Root Cause (RC)

Traditional shopping requires customers to spend considerable time visiting multiple stores to compare products and prices. Small businesses often struggle to establish an online presence due to technical and financial limitations. Manual inventory and order management processes can lead to inefficiencies. These issues create a need for a centralized e-commerce solution

10. Your Solution (SL)

ShopEZ is a MERN-stack e-commerce platform designed to simplify online shopping and product management. It enables users to browse products, manage carts, place orders, and track deliveries. Sellers and administrators can efficiently manage inventory, products, and customer orders through dedicated management features. The platform provides an affordable and practical solution for both learning and business purposes.
