Brainstorm & Idea Prioritization : (Step-1: Team Gathering, Collaboration and Select the Problem Statement) ShopEZ is a MERN stack e-commerce web application developed as a single-person college project. The problem identified was the lack of a simple, secure, and efficient online shopping platform that caters to both customers and store administrators. The problem statement defined was "How might we build a simple and secure online shopping platform where users can browse products, manage their cart, and place orders, while admins can manage the entire store efficiently?"

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

Students and small businesses lack an affordable, easy-to-deploy e-commerce platform that demonstrates real-world full-stack development skills. Existing platforms are either too complex, expensive, or not educational enough for college-level learning.

Key rules of brainstorming

To run a smooth and productive session

- 🗣️ Stay in topic.
- 💡 Encourage wild ideas.
- ⏸️ Defer judgment.
- 👂 Listen to others.
- 🗣️ Go for volume.
- 👁️ If possible, be visual.

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H** key on the keyboard.
